

Sergio Vallortigara

Albero del calcolo

L'albero del calcolo è adatto ai bambini in gamba dai 5 ai 9 anni.

Con addizioni e sottrazioni dai 5 ai 7 anni, con moltiplicazioni e divisioni dai 7 ai 8/9 anni.

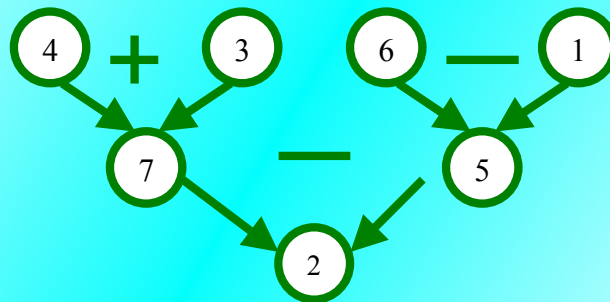

E' un gioco di calcolo che consiste nell'inserire i numeri nei cerchi ed eseguire le operazioni indicate.

Se le operazioni non sono indicate è il bambino stesso che le indica e poi inserisce i numeri.

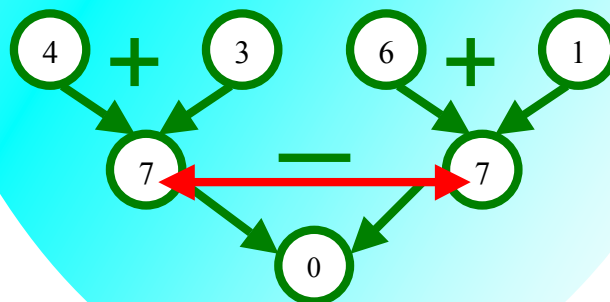

Vi è una regola che lo complica:

"non si può usare 2 volte lo stesso numero".

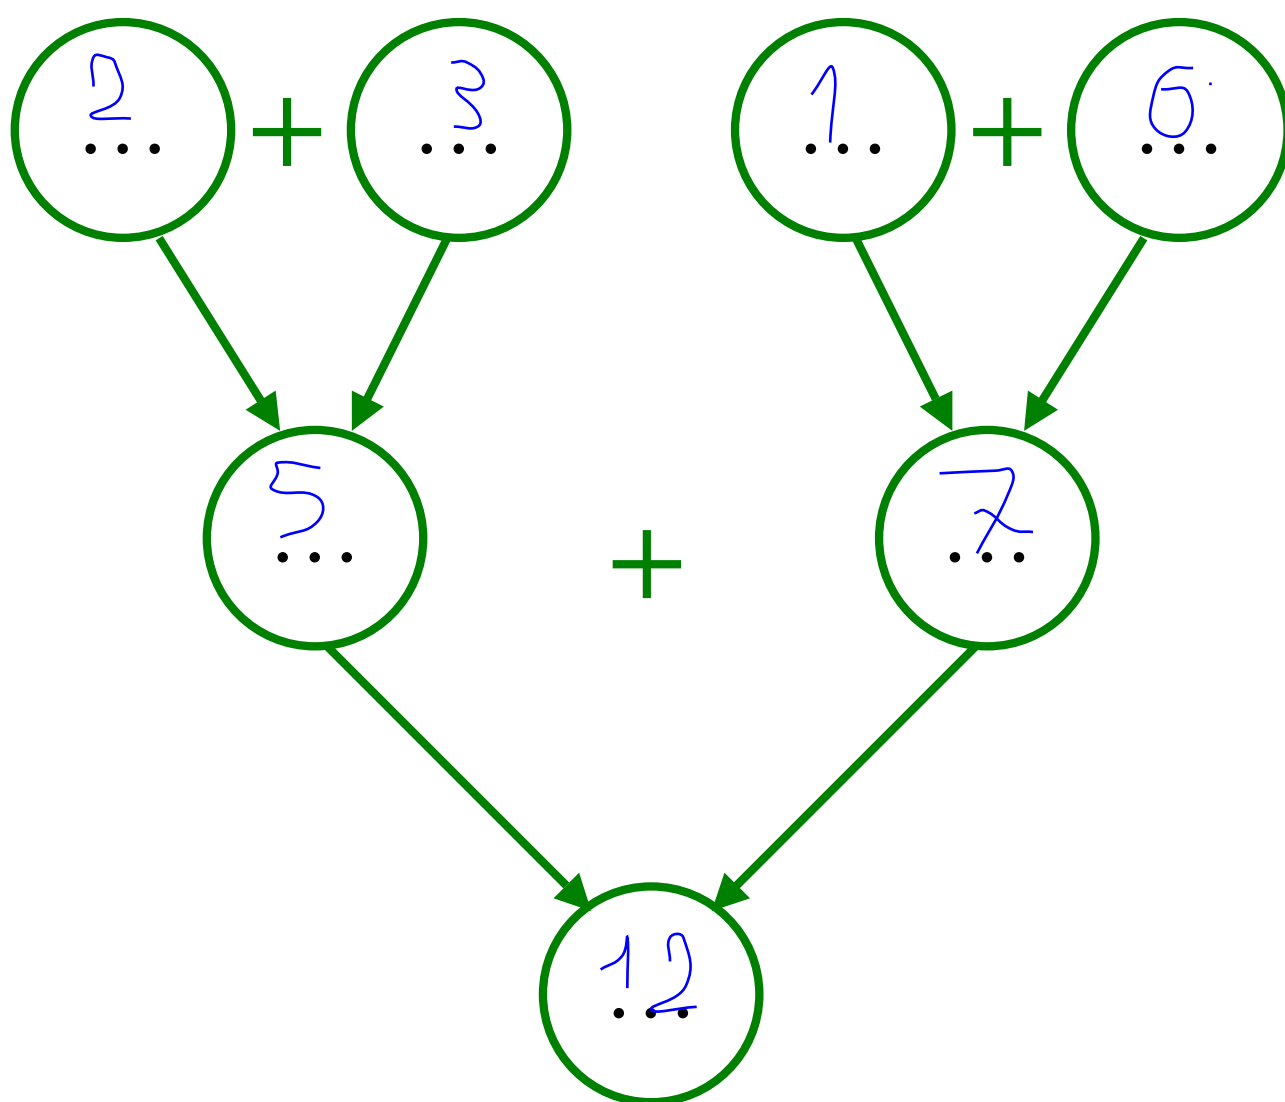

2 esempi: il primo esatto

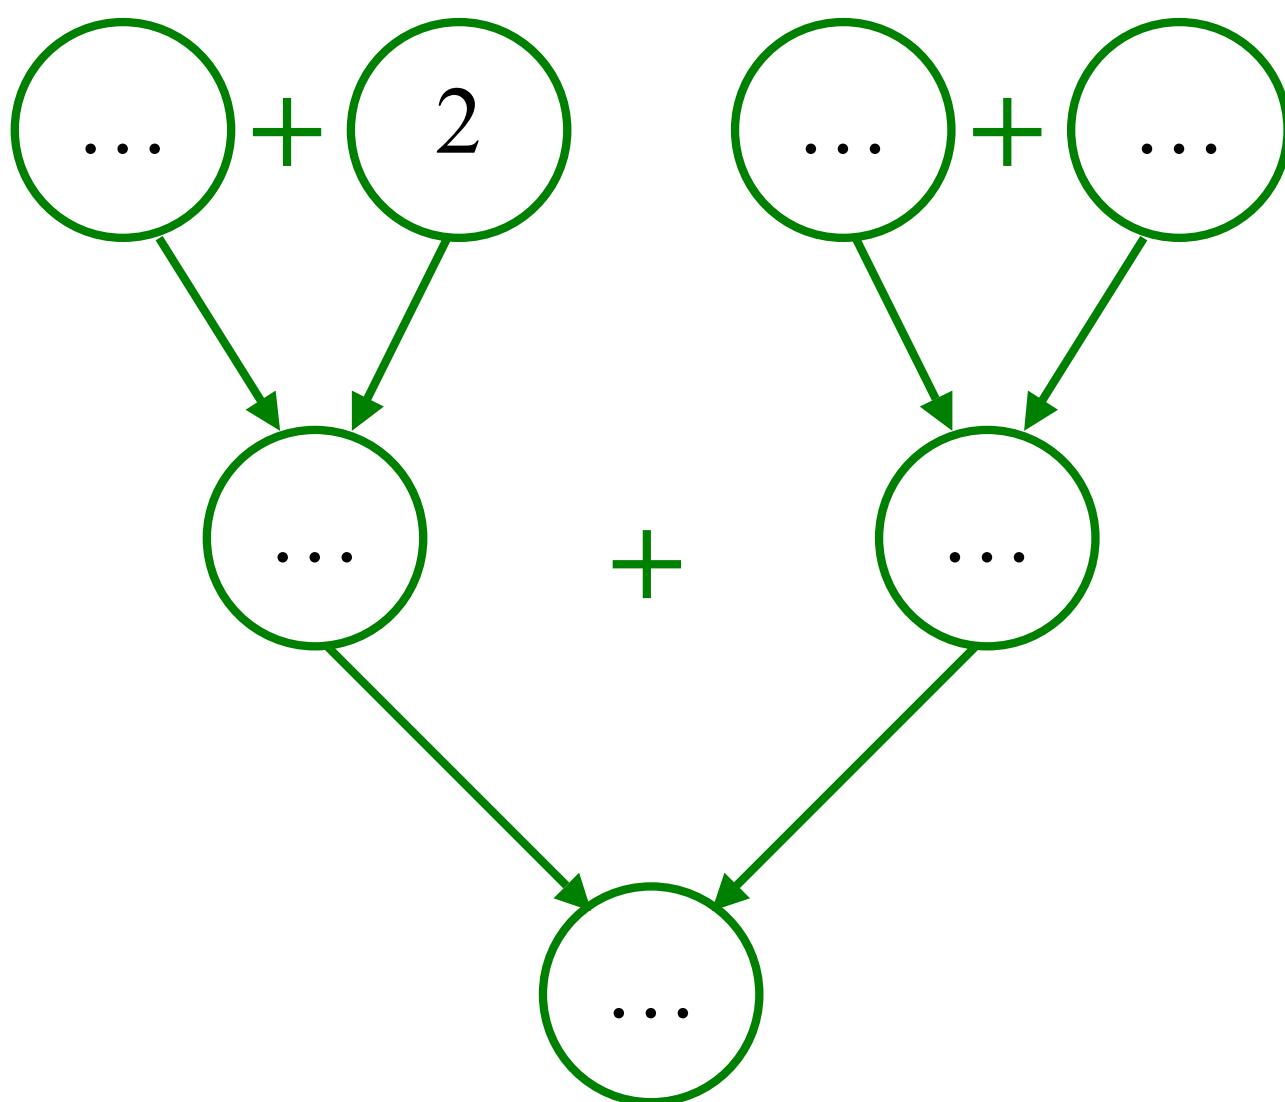

il secondo è errato perché è stato usato due volte il 7
